DISTINGUISHING CHARACTERISTICS:

Distribution Operator I – This is the entry level class in the Distribution Operator group. Positions in this class typically have little related work experience and lack the ability to perform the full range of duties independently. The Distribution Operator I class is distinguished from the Level II by the performance of less than the full range of duties assigned to the Level II. Operator I works under direct supervision while learning job tasks, progressing to general supervision as procedures and processes of assigned area of responsibility are learned.

Distribution II – This is the journey level class in the Distribution Operator group and is distinguished from the Level I by the assignment of the full range of duties. Employees at this level receive only occasional instruction or assistance as new, unusual or unique situations arise and are fully aware of the operating procedures and policies within the work unit. Positions in this class are normally filled by advancement from Level I.
