BOIL WATER ADVISORY

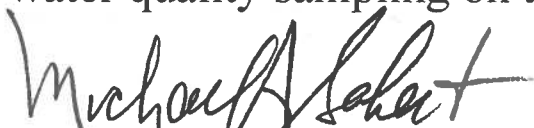

February 16, 2022

BWA 2022-02-04

In accordance with the Louisiana Department of Health's Sanitary Code and out of an abundance of caution, 36 customers residing in Imperial Landing Subdivision are affected by this Boil Water Advisory. Please see the attached map for a more detailed graphic representation of the Boil Water Advisory area. Customers are advised to boil their water to a hard rolling boil for at least 1 minute prior to consumption. Please visit www.ldh.la.gov or www.tpcw.org for more specific detail information concerning what to do when a Boil Water Advisory has been issued.

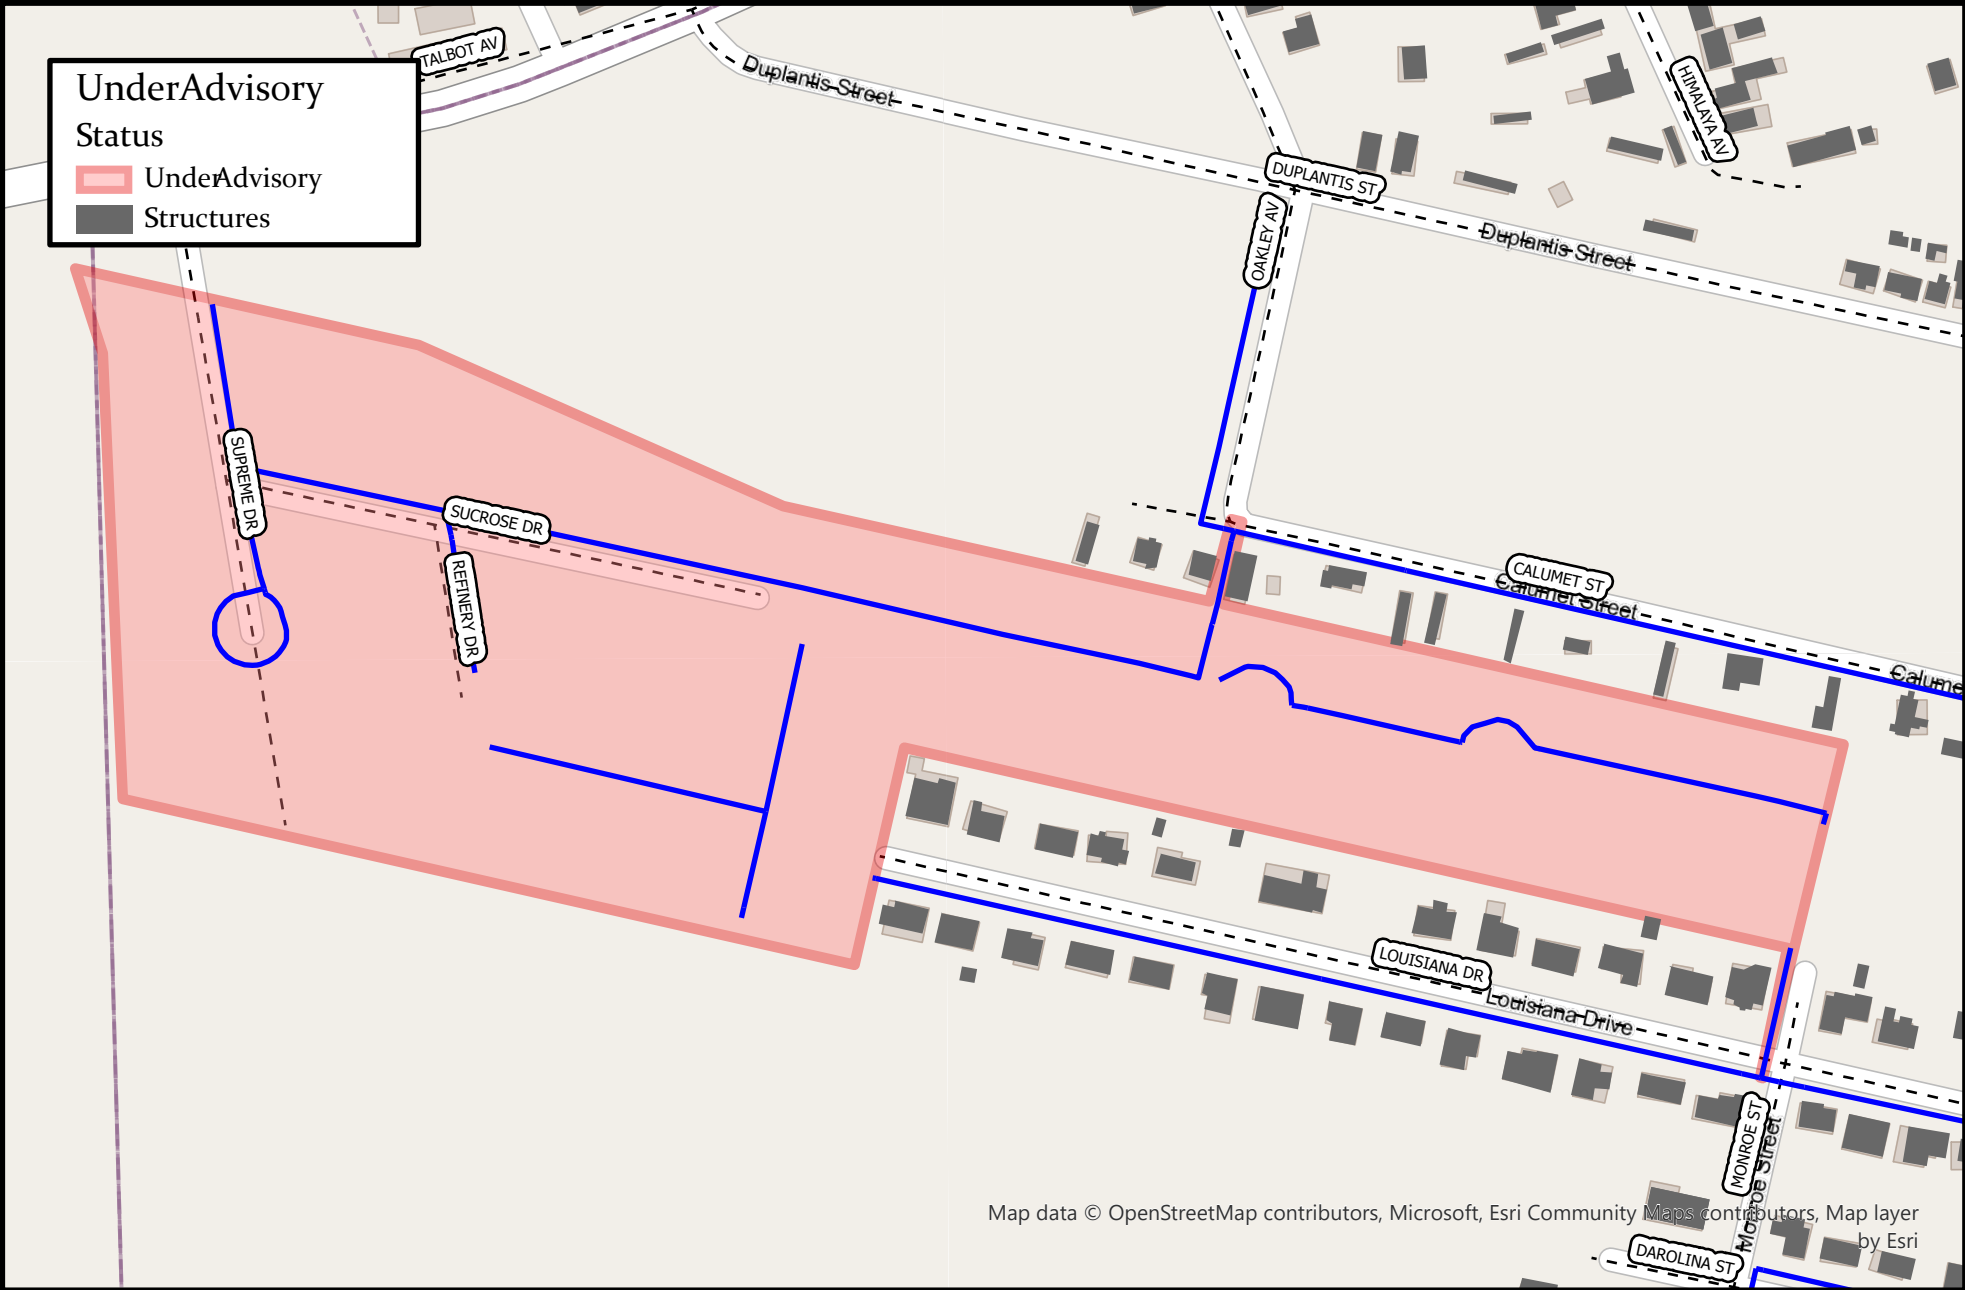

The developer of the subdivision is expanding the water system and requires that the water be turned off to allow for the connection of the new waterline causing a drop in pressure below the acceptable minimum pressure level of 20 psi requiring this Boil Water Advisory notice. Water samples have been taken with results expected back before 5 tomorrow, Thursday, February 17, 2022.

Remember to boil your water in a hard rolling boil for at least 1 minute prior to human consumption. Please like, share, and follow us on Facebook for information concerning your drinking water supplier and the results of water quality sampling on testing of your water.
