

CONSOLIDATED WATERWORKS DISTRICT NO.1
TERREBONNE PARISH

Dear Terrebonne Resident,
Our AMI Meter Replacement Project has come to your neighborhood!

As part of our ongoing efforts to improve services to our customers, we have partnered with Pedal Valves, Inc and Badger Meter. Inc to install brand new water meters with advanced capabilities. One of two things occurred today when we came to install your new meter (checked below):

- ☐ Your water meter installation was completed successfully!

Following the installation:

- ☐ **Your water line was flushed to remove air and/or debris in the line.**
No further action on your part is required.
- ☐ **Your water line was NOT flushed due to no access to an outside spigot.** To remove air/debris, run cold water through an outside spigot or indoor faucet for 1 minute or until clear.

- ☐ There was an issue installing your meter.
Details:

Please call Pedal Valves, Inc at (xxx)xxx-xxxx as soon as possible to resolve the issue.

During the installation, your service was interrupted. After installation, your water service was restored, and the water line was flushed.

If your water is discolored or there is air in the line, please flush your line by using an outdoor hose or turning on the cold water in your sink.

If your water service was off upon arrival, we left your water service off.

If you are Experiencing any issues post-installation, please call Pedal Valves, Inc at (985)722-2674. Please note, PVI has the right to fix any issues resulting from installation prior to the owner contacting a plumber.

8814 Main St
Houma, LA 70363

About the AMI Meter Replacement Project

As part of our mission to bring innovative services to our community, Terrebonne Parish Consolidated Waterworks District No.1 is upgrading your water meter. This important project will improve the way we read your water meter, provide you with more insight into your family's/business's water usage, and even provide notifications of possible water leaks in your home/business. You will benefit from:

- **More precise bills due to more accurate meter readings**

For general information about our project and the capabilities of the new meters, we invite you to visit our website at tpcw.org

Terrebonne Parish Consolidated Waterworks District No. and PVI thank you for your cooperation in making this a successful project.
