CHANGE IN PRIMARY DISINFECTANT

Please be advised that effective Friday, August 5, 2022, we will begin the process of returning to chloramine, combination of chlorine and ammonia, as our primary source of water disinfection. There is nothing that you must do, nor will you be adversely affected, since we normally use chloramines ten (10) months out of the year and are simply returning to that method of disinfection. We change to free chlorine each year for about two (2) months to aid in assuring the safest water system available as water temperatures and nitrification are at their peak and the potential for non-compliant water the greatest.

You may visit the Louisiana Department of Health's website, <https://ldh.la.gov/page/963>, for a more detailed explanation of the Safe Water Drinking Program or www.tpcw.org for additional information. If you have or would like additional information, please contact us at info@tpcw.org or call 985-879-2495.
