JUNE 12, 2023 TEMPORARY CHANGE IN DISINFECTANT

On June 14, 2023, The District will change from our primary disinfectant chloramines, which are a mixture of chlorine and ammonia, to free chlorine as prescribed by the Safe Water Drinking Act of the Federal EPA. The District requested and Louisiana Department of Health granted permission to change to free chlorine to assure drinking water safety. Free chlorine has done its job in the past and we feel confident that this change will only enhance the safety of your drinking water.

So how does this change affect you? Not at all. Your water will continue to be monitored as always to assure its safety and quality. You may notice that the smell of chlorine is more present than before but that's it. The water will remain safe for human consumption.

You may visit our website, www.tpcw.org, or visit the Louisiana State Department of Health's website, www.la.gov.org, for a more detailed explanation of free chlorine in the drinking water. We are always available to discuss at greater length your concerns or questions. Please feel free to contact us.

Please like, share, and follow us on social media for up to the minute news and announcements concerning your drinking water. Thank you.
