CHANGE IN PRIMARY DISINFECTANT
CHLORAMINES

On Monday, July 24, 2023, we will change back to chloramine, mixture of chlorine, 4 parts, and ammonia, 1 part, as our primary disinfectant. In accordance with our approved Nitrification Plan the purpose of the change has been met. The water will continue to be monitored to assure its compliance to all required standards. This change will NOT affect the quality of the water.

You may visit our website, www.tpcw.org, or The Louisiana Department of Health's, www.la.gov.org, for a more detailed explanation of chloramines in the drinking water. We are always available to discuss in greater detail any questions or concerns you may have concerning your drinking water. Please feel free to contact us.

Please like, share, and follow us on social media for up to the minute news concerning your drinking water. Thank You.

Michael A. Sobert
